

Year 6 Home Learning – Friday 5th March, 2021

Today's lessons are: Science, SPaG, Writing, arithmetic

You should be completing at least 3 hours of work per day.

If possible, please return work each day by 3.30pm via email or Dojo (take a photo of the work) so that we can mark it and send you feedback that day. If work is sent later, feedback will be given the next day.

If you have any questions, please email me:

LilyTombleson@peckoverprimary.org

You will find a timetable below of the lessons for each day.

Science

On your own, or with someone in your family, work your way through the slides learning about Carl Linnaeus and the Linnaean system to classify animals. Your task is to research the animals on the slides, recording on the graphic organiser what the classification would be for each of them. This lesson is a little tricky to get your head around, but don't worry too much, just do your best.

Topic – Writing

There are no slides to follow for this lesson. All you need to do is write up your narrative, including all of your changes you made when editing. Make sure it is your best handwriting. You have worked hard on this over the past two weeks and it would be a shame to not have amazing handwriting.

SPaG – Spelling practice

Follow the slides and get a member of your family to test you on some of the year5/6 spelling words, which are on the slides. Then, use the words to make up silly sentences. See the last slide to see my examples.

Arithmetic

Complete the arithmetic test, can you beat your score from last time?
